

## Use water wisely. It's essential.

---

Cal Water is offering residential water-use surveys at no charge to help customers identify opportunities to save water at home. This program is available to Cal Water customers who live in single-family homes.

If you choose to participate, we will send a trained water conservation specialist from WaterWise to your home to evaluate your indoor and outdoor water use. You will receive information about how to read your meter, request free water-efficient plumbing fixtures, and water your landscaping more efficiently. There are a limited number of free surveys available, so call WaterWise today at (866) 685-2322.

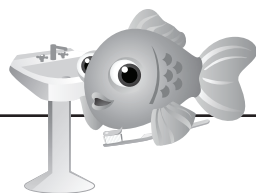

For more information on conservation as well as water-efficient appliance rebates and available programs, visit [www.calwater.com](http://www.calwater.com).
