

Water Conservation Report: South San Francisco District

South San Francisco Water Conservation 2011

California Water Service Company (Cal Water) continues to expand current conservation programs and develop new programs throughout its 24 service areas in order to meet recently adopted state policies requiring reductions in per capita urban water use. This report provides a general overview of the South San Francisco District, urban water demand, and reduction targets calculated specifically for this district. In addition, a summary of 2011 conservation activities is included.

South San Francisco Service Area Description

The South San Francisco District is located in northern San Mateo County approximately six miles south of the City of San Francisco. The district serves the communities of South San Francisco, Colma, a small portion of Daly City, and an unincorporated area of San Mateo County known as Broadmoor. The system is bounded on the north by San Bruno Mountain, on the west and northwest by Daly City, on the south by the City of San Bruno, and on the east by the San Francisco Bay.

The South San Francisco District's population in 2011 was approximately 58,800. On average, the district receives about 20 inches of rainfall annually, most of which falls in the late autumn, winter, and early spring. The late spring, summer, and early autumn months are generally dry. Annual evapotranspiration in the district averages 39 inches, which means that most landscapes cannot survive on rainfall alone and must be irrigated.

California Water Service Company

Cal Water is an investor-owned water utility supplying water service to nearly 2 million Californians through 470,000 connections. Its 24 separate water systems serve 63 communities throughout California, from Chico in the north to the Palos Verdes Peninsula in the south. California Water Service Group, Cal Water's parent company, also serves communities in Washington, New Mexico, and Hawaii. Rates and operations for districts located in California are regulated by the California Public Utilities Commission (CPUC). Cal Water has provided water service to the South San Francisco community since 1931.

**Use water wisely.
It's essential.**

Rev. 5/12

Cal Water is committed to supporting our customers as part of our plan to provide a reliable water supply

2011 Water Demand

2011 per capita demand in the South San Francisco District was 128 gallons per capita per day (gpcd). Per capita demand has trended down recently. Changes in demand can be attributed to a number of factors, including, but not limited to, economic conditions, public awareness, climate, and implementation of conservation programs.

Statewide Urban Water Demand Reduction Policies

Statewide policies and agreements impacting water use reduction demands include recent decisions by the CPUC directing Class A water utilities to reduce per capita urban water demand; state legislation, Senate Bill x7-7 (California Water Code section 10608.16-10608.44), mandating that urban water suppliers reduce per capita demand 20% by 2020; and the Memorandum of Understanding Regarding Urban Water Conservation in California, administered by the California Urban Water Conservation Council (CUWCC).

Senate Bill x7-7 (SB x7-7) requires each urban retail water supplier to develop and meet interim and 2020 urban water use reduction targets, in accordance with specific requirements, in order to be eligible for state grants and loans. The calculated 2015 and 2020 targets for Cal Water's South San Francisco District are 138 gpcd and 124 gpcd, respectively.

Cal Water will continue to implement water conservation measures to meet state reduction requirements. Additional water savings are anticipated to come from plumbing fixture efficiency codes and past conservation program investments. Two recent California laws, Assembly Bill 715 (Chapter 499 – Statutes of 2007) and Senate Bill 407 (Chapter 587 – Statutes of 2009), are also expected to accelerate the replacement of low-efficiency plumbing fixtures – primarily toilets – with higher-efficiency alternatives.

Water Demand and Local Rainfall

Our customers' conservation efforts water supply for today and tomorrow.

2011 Water Conservation

2011 water conservation activities were broad in scope and implemented with the goal of meeting 2020 urban water use reduction requirements. The 2011 South San Francisco District Conservation Program Summary on the next page provides information on implemented programs, activity levels, annual water savings, and lifetime water savings achieved by these programs.

Partnerships and Coordination

Cal Water draws on the expertise and energy of many agencies and works cooperatively with others to increase the effectiveness of our conservation programs. Cal Water is an active member of the CUWCC and Alliance for Water Efficiency, and is an Environmental Protection Agency WaterSense Program Partner. In addition, Cal Water coordinates with wholesalers and other retailers on local projects when possible.

Future Plans and Updates

In an effort to meet statewide requirements for urban water use reduction, Cal Water developed Conservation Master Plans for each of its service areas. These plans are designed to provide a framework for meeting statewide requirements and to chart a course for Cal Water's conservation programs for the period 2011-2015. Cal Water will regularly review these plans and make adjustments as appropriate. Key monitoring and updating activities include program tracking, research study participation, and coordination with local planning and enforcement departments.

GPCD by Customer Type and State Legislated Targets

2011 South San Francisco District Conservation Program Summary

	Activity Level	Activity Savings Lifespan (years)	Estimated Annual Water Savings (gallons)	Estimated Lifetime Water Savings (gallons)
Single-Family Residential High-Efficiency Toilet Rebate Program	61	25	390,766	5,200,614
Multi-Family Residential High-Efficiency Toilet Rebate Program	136	25	1,002,456	8,361,383
Commercial High-Efficiency Toilet Rebate Program	382	25	2,205,286	24,262,470
Single-Family Residential High-Efficiency Clothes Washer Rebate Program	449	12	1,450,090	11,507,434
Single-Family Residential Water Use Survey Program	47	5	552,391	2,262,096
Single-Family Residential High-Efficiency Sprinkler Nozzle Program	43	10	44,806	448,060
Residential Conservation Kit Program	232	5	1,020,800	3,846,786
Water Wise School Education Program	224	5	985,600	3,714,138
Large Landscape Water Use Reports	62	1	1,390,668	1,390,668
Large Landscape Survey Program	2	5	115,626	578,130
Total			9,158,489	61,571,779
