

# 2012 Water Conservation Report

## South San Francisco District

Cal Water's conservation programs are broad in scope and implemented with the goal of meeting 2020 urban water use reduction requirements. Approximately 16 million gallons (MG) of water were conserved through the programs implemented in 2012. These programs are expected to save 123 MG over their lifetime.

- Single-Family Residential High-Efficiency Toilet Rebates
- Multi-Family Residential High-Efficiency Toilet Rebates
- Commercial High-Efficiency Toilet Rebates
- Single-Family High-Efficiency Clothes Washer Rebates
- Commercial High-Efficiency Clothes Washer Rebates
- Single-Family Bathroom Fixture Replacement Program
- Multi-Family Bathroom Fixture Replacement Program
- Commercial Bathroom Fixture Replacement Program
- Single-Family Residential Surveys
- Single-Family High-Efficiency Sprinkler Nozzle Program
- Turf Replacement Program
- Single-Family Residential Conservation Kits
- Multi-Family Residential Conservation Kits
- Water Wise School Education Program
- Large Landscape Water Use Reports
- Large Landscape Surveys

### Bathroom Fixture Replacement Program

688 toilets installed & 6 MG conserved in 2012. Expected lifetime savings of 67 MG over a 25 year product life.

### Large Landscape Water Use Reports

83 reports completed & 2 MG conserved in 2012. Expected lifetime savings of 2 MG over a 1 year product life.

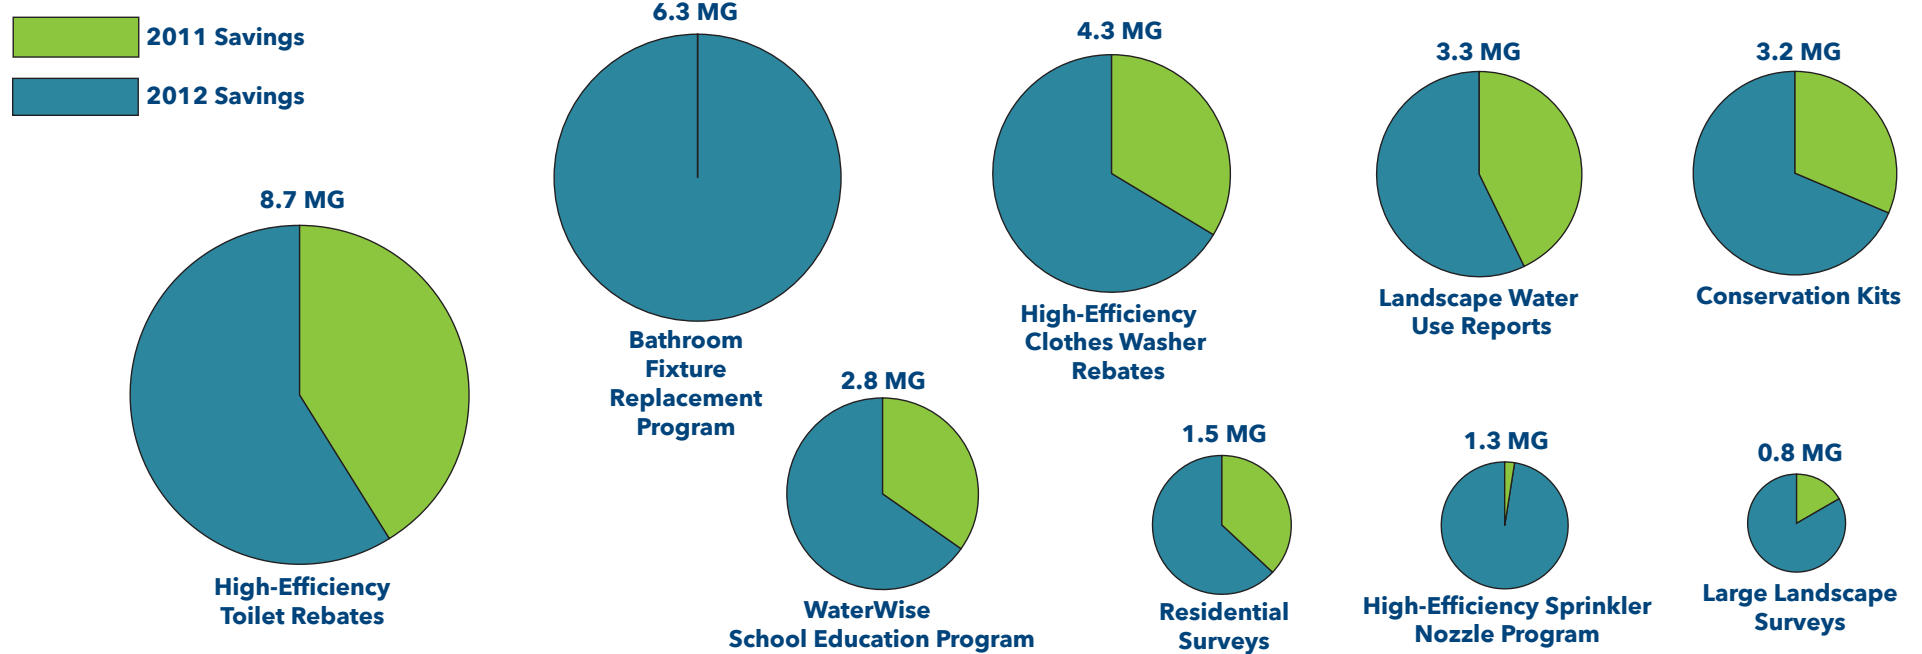

### High-Efficiency Toilet Rebates

259 toilet rebates & 2 MG conserved in 2012. Expected lifetime savings of 18 MG over a 25 year product life.

◆=1 MG of active savings in 2012

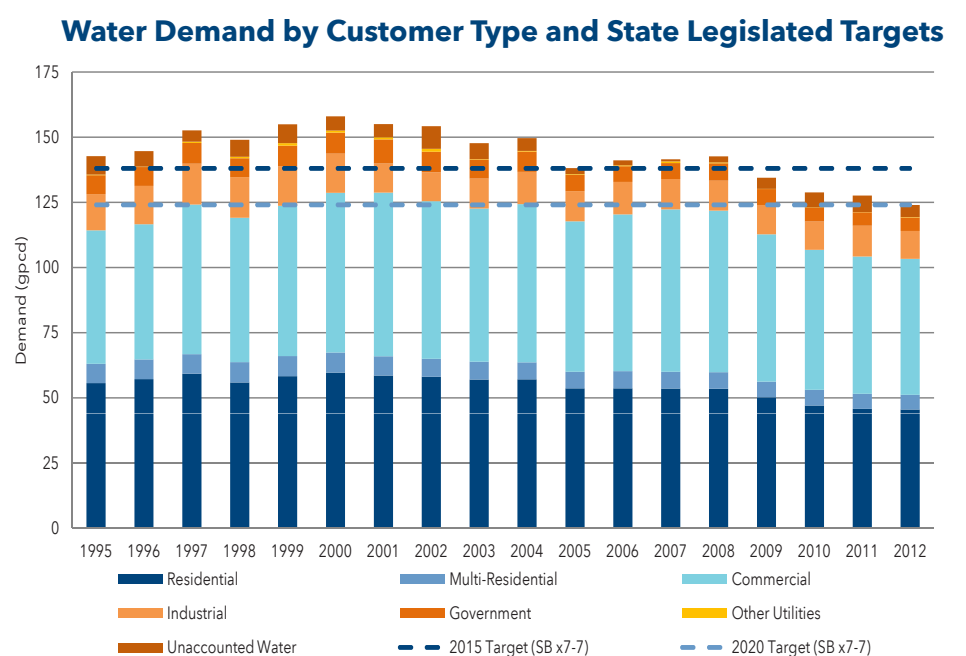

**Cumulative Savings** - Water savings from most of the existing conservation programs continue well after implementation. In South San Francisco, more than 32 MG of water have been conserved as a result of programs implemented in 2011 and 2012.

**Statewide policies and agreements** mandate water utilities to significantly reduce per capita urban water demand by 2020. Over the last several years water use has trended down. Changes in demand can be attributed to a number of factors, including, but not limited to, economic conditions, public awareness, climate, and implementation of conservation programs.

gpcpd = gallons per capita per day

**Use water wisely.  
It's essential.**
