

# 2012 Water Conservation Report

## Stockton District

Cal Water's conservation programs are broad in scope and implemented with the goal of meeting 2020 urban water use reduction requirements. Approximately 22 million gallons (MG) of water were conserved through the programs implemented in 2012. These programs are expected to save 140 MG over their lifetime.

- Single-Family Residential High-Efficiency Toilet Rebates
- Multi-Family Residential High-Efficiency Toilet Rebates
- Commercial High-Efficiency Toilet Rebates
- Single-Family High-Efficiency Clothes Washer Rebates
- Commercial High-Efficiency Clothes Washer Rebates
- Single-Family Residential Smart Controller Rebates
- Single-Family Residential Bathroom Fixture Replacement Program
- Multi-Family Residential Bathroom Fixture Replacement Program
- Commercial Bathroom Fixture Replacement Program
- Single-Family Residential Surveys
- Multi-Family Residential Surveys
- Single-Family High-Efficiency Sprinkler Nozzle Program
- Commercial High-Efficiency Sprinkler Nozzle Program
- Single-Family Residential Conservation Kits
- Multi-Family Residential Conservation Kits
- Water Wise School Education Program
- Large Landscape Water Use Reports
- Large Landscape Surveys

### Bathroom Fixture Replacement Program

524 toilets installed & 5 MG conserved in 2012. Expected lifetime savings of 54 MG over a 25 year product life.

### Conservation Kits

1,159 kits distributed & 5 MG conserved in 2012. Expected lifetime savings of 19 MG over a 5 year product life.

### High-Efficiency Sprinkler Nozzle Program

3,365 nozzles distributed & 4 MG conserved in 2012. Expected lifetime savings of 35 MG over a 10 year product life.

◆ = 1 MG of active savings in 2012

**Cumulative Savings** - Water savings from most of the existing conservation programs continue well after implementation. In Stockton, over 69 MG of water have been conserved as a result of programs implemented in 2011 and 2012.

**Statewide policies and agreements** mandate water utilities to significantly reduce per capita urban water demand by 2020. Over the last several years water use has trended down. Changes in demand can be attributed to a number of factors, including, but not limited to, economic conditions, public awareness, climate, and implementation of conservation programs.

### Water Demand and Local Rainfall

### Water Demand by Customer Type and State Legislated Targets

GPCPD= gallons per capita per day

**Use water wisely.  
It's essential.**
