2013

3 MG
2014

The State of California is requiring utilities to achieve a **25%** reduction in potable, urban water use statewide by **February 2016**. To meet this target, the State has assigned each water system to a water use reduction tier based upon average July-September 2014 residential per capita demand (R-GPCD).

Cal Water's Dixon District is required to meet the Tier 7 reduction of **28%** from 2013.

2014 Residential GPCD

Total GPCD & State Legislated Targets

Statewide policies mandate water utilities to **significantly reduce overall per capita urban water demand** (gpcd: gallons per capita per day) and meet specific 2015 and 2020 targets per district.
