

2014 Conservation Update

King City District

Implementation of Cal Water's conservation programs has resulted in a savings of **160** thousand gallons (K) of water in **2014** and is expected to save **1.1** million gallons (MG) over the lifetime of these programs.

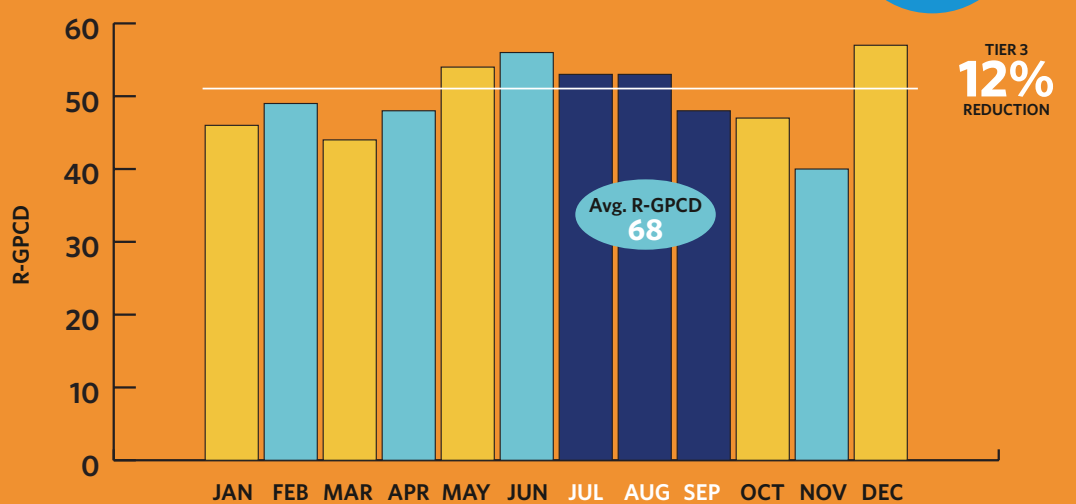

Since 2011, our programs have saved **8** MG and are expected to save **22** MG over their lifetime.

The State of California is requiring utilities to achieve a **25%** reduction in potable, urban water use statewide by **February 2016**. To meet this target, the State has assigned each water system to a water use reduction tier based upon average July-September 2014 residential per capita demand (R-GPCD).

Cal Water's King City District is required to meet the Tier 3 reduction of **12%** from 2013.

2014 Residential GPCD

Total GPCD & State Legislated Targets

Statewide policies mandate water utilities to **significantly reduce overall per capita urban water demand** (gpcd: gallons per capita per day) and meet specific 2015 and 2020 targets per district.
