SERVICE TO PRIVATELY OWNED FIRE PROTECTION SYSTEMS

APPLICABILITY

Applicable to all water service furnished for privately owned fire protection systems.

TERRITORY

All communities served by the Antelope Valley District.

RATES

	<u>Per Month</u>	
For each inch of diameter of service connection .....	\$13.6931	0

SPECIAL CONDITIONS

1. All bills are subject to the reimbursement fee set forth on Schedule UF.
2. The customer will pay, without refund, the entire cost of the private fire service facilities.
3. The private fire service facilities shall be installed by the utility or under the utility's direction and shall be the sole property of the applicant but subject to the control of the utility, with the right to alter, repair, replace and the right to remove upon discontinuance of service.
4. The minimum diameter for the private fire service connection will be four inches. The maximum diameter shall not be larger than the diameter of the water main to which the private fire service facilities are connected.
5. If a water main of adequate size is not available adjacent to the premises to be served, then a new main from the nearest existing main of adequate size will be installed by the utility at the cost of the customer. Such cost shall not be subject to refund.
6. The private fire service facilities will include a detector check valve or other similar device acceptable to the utility which will indicate the use of water. The facilities may be located within the customer's premises or within public rights of way adjacent thereto. Where located within the premises, the utility and its duly authorized agents shall have the right of ingress to and egress from the premises for all purposes related to said facilities. In the event the installation is solely for a private fire hydrant facility, the requirement for a detector check valve or other similar device may be waived.
7. No structure shall be built over the private fire service facilities and the customer shall maintain and safeguard the area occupied by the private fire service facilities from traffic and other hazardous conditions. The customer will be responsible for any damage to the private fire service facilities whether resulting from the use or operation of appliances and facilities on customer's premises or otherwise.
8. Subject to the approval of the utility, any change in the location or construction of the private fire service facilities as may be requested by public authority or the customer will be made by the utility following payment to the utility of the entire cost of such change.
9. The customer's installation must be such as to separate effectively the private fire service facilities from that of the customer's regular domestic water service. Any unauthorized use of water from the private fire service facilities will be charged for at the applicable tariff rates and may be grounds for the utility's discontinuing private fire service without liability to the utility.
10. There shall be no cross connection between the systems supplied by water through the utility's private fire service facilities and any other source of supply without the specific approval of the utility. The specific approval, if given, will at least require at the customer's expense a special double check valve installation or other backflow prevention device acceptable to the utility. Any cross connection may be grounds for immediately discontinuing private fire service without liability to the utility.
11. The utility will supply only such water at such pressure as may be available from time to time as a result of its normal operation of the system. The customer shall indemnify the utility and save it harmless against any and all claims arising against the utility for any loss or damage resulting from service under this schedule. Section 774 of the Public Utilities Commission Code limits the liability of the utility resulting from a claim regarding adequacy of pressure or supply for fire protection service.
12. The customer shall be responsible for the periodic testing of any backflow prevention devices as required by public authority or the utility. Any repair or replacement of such devices or of any other facilities installed to provide private fire service shall be done at the customer's expense. Any refusal to comply with the above requirements may be grounds for the utility's discontinuing private fire service without liability to the utility.

SERVICE TO PUBLIC FIRE HYDRANTS

APPLICABILITY

Applicable to all water service furnished to public fire hydrants of a public authority; such as, a municipality, country, or other political subdivision of the State.

TERRITORY

Bakersfield and vicinity, Kern County.

RATES

Per Hydrant Per  
 Month\*  
 Facilities Installed at  
 Cost of Public Authority

For each hydrant ..... \$1.64 (I)

SPECIAL CONDITIONS

1. The above rates cover delivery of water used for fire protection and for no other purpose. For water delivered through fire hydrants for any other purpose, charges will be made therefore at the quantity rate under Schedule No. BK-1-NR Nonresidential Metered Service.
2. The cost of relocation of any hydrant shall be paid by the party requesting relocation.
3. Fire hydrants will be attached to the Utility's distribution mains only as authorized by the proper public authority. Such authorization must designate the ownership and size of hydrants and specifically state the location at which each is to be installed.
4. The Utility will supply to the hydrant only such water at such pressure as may be available from time to time in the operation of Utility's system. However, unless otherwise authorized by the Commission, all new and replacement mains installed after June 5, 1975, have been designed so as to comply with the minimum flow requirement set forth in G.O. No. 103.
5. Whenever the facilities are installed at the cost of a public authority, such costs shall include all labor and materials except that the utility will provide the materials for the service tee and the shutoff valve. The service tee and valve will be installed only by authorized utility personnel.

If a distribution main of adequate size to serve a private fire protection system in addition to all other normal service does not exist in the street or alley adjacent to the premises to be served, then a service main from the nearest existing main of adequate capacity will be installed by the Utility at the cost of the applicant. Such cost shall not be subject to refund.
3. Service hereunder is for private fire protection systems to which no connections for other than fire protection purposes are allowed and which are regularly inspected by the underwriters having jurisdiction, are installed according to specifications of the Utility, and are maintained to the satisfaction of the Utility. The Utility may require the installation of a detector check valve with meter for protection against theft, leakage, or waste of water.
4. For water delivered for other than service to privately owned fire protection systems, charges will be made therefor under one of the following schedules: BG-1-R or BG-1-NR.
5. The Utility will supply only such water at such pressure as may be available from time to time as a result of normal operation of Utility's system.
6. All bills are subject to the reimbursement fees set forth on Schedule UF.

METERED RECYCLED WATER SERVICE

Page 2 of 2

SPECIAL CONDITIONS

1. All bills are subject to the reimbursement fees set forth on Schedule UF.
2. Recycled water service refers to non-potable water that has been processed and treated by one of the following methods:
  - a. Title 22 Water refers to wastewater that has undergone tertiary treatment that meets recycled water use standards as established in Title 22 of the California Code of Regulations, Division 4 Environmental Health, Chapter 3 Reclamation Criteria, Articles 1 through 10.
  - b. R.O. Water refers to Title 22 Water that has further undergone reverse osmosis treatment to remove salts and dissolved solids.
  - c. Nitrified Water refers to Title 22 Water that has further undergone a biological treatment and processing for removal of ammonia.
3. A Recycled Water Memorandum Account has been established to track under/over collections associated with the purchase and sale of recycled water. This account will include all charges from West Basin Municipal Water District not included in the current recycled rate, as well as the lower cost of water derived from charges and billings under West Basin's declining block structure and the Company's declining block structure. West Basin Municipal Water District credits not credited directly to a customer will be credited to this account and will offset future rate increases for recycled water customers. This account will be reconciled at least annually on or about the date date when West Basin Municipal Water District changes its rates.
4. All bills are subject to any applicable surcharges/surcredits on Schedules RSF, LIRA and AS.

SERVICE TO PRIVATELY OWNED FIRE PROTECTION SYSTEMS

APPLICABILITY

Applicable to all water service furnished for privately owned fire protection systems.

TERRITORY

Portions of Carson, Los Angeles, Long Beach, Torrance, and vicinity, Los Angeles County.

RATES

	<u>Per Month</u>	
For each inch of diameter of service connection .....	\$11.82	( I )

SPECIAL CONDITIONS

1. All bills are subject to the reimbursement fees set forth on Schedule UF.
2. The customer will pay, without refund, the entire cost of the private fire service facilities.
3. The private fire service facilities shall be installed by the utility or under the utility's direction and shall be the sole property of the applicant but subject to the control of the utility, with the right to alter, repair, replace and the right to remove upon discontinuance of service.
4. The minimum diameter for the private fire service connection will be four inches. The maximum diameter shall not be larger than the diameter of the water main to which the private fire service facilities are connected.
5. If a water main of adequate size is not available adjacent to the premises to be served, then a new main from the nearest existing main of adequate size will be installed by the utility at the cost of the customer. Such cost shall not be subject to refund.
6. The private fire service facilities will include a detector check valve or other similar device acceptable to the utility which will indicate the use of water. The facilities may be located within the customer's premises or within public rights of way adjacent thereto. Where located within the premises, the utility and its duly authorized agents shall have the right of ingress to and egress from the premises for all purposes related to said facilities. In the event the installation is solely for a private fire hydrant facility, the requirement for a detector check valve or other similar device may be waived.
7. No structure shall be built over the private fire service facilities and the customer shall maintain and safeguard the area occupied by the private fire service facilities from traffic and other hazardous conditions. The customer will be responsible for any damage to the private fire service facilities whether resulting from the use or operation of appliances and facilities on customer's premises or otherwise.
8. Subject to the approval of the utility, any change in the location or construction of the private fire service facilities as may be requested by public authority or the customer will be made by the utility following payment to the utility of the entire cost of such change.
9. The customer's installation must be such as to separate effectively the private fire service facilities from that of the customer's regular domestic water service. Any unauthorized use of water from the private fire service facilities will be charged for at the applicable tariff rates and may be grounds for the utility's discontinuing private fire service without liability to the utility.
10. There shall be no cross connection between the systems supplied by water through the utility's private fire service facilities and any other source of supply without the specific approval of the utility. The specific approval, if given, will at least require at the customer's expense a special double check valve installation or other backflow prevention device acceptable to the utility. Any cross connection may be grounds for immediately discontinuing private fire service without liability to the utility.
11. The utility will supply only such water at such pressure as may be available from time to time as a result of its normal operation of the system. The customer shall indemnify the utility and save it harmless against any and all claims arising against the utility for any loss or damage resulting from service under this schedule. Section 774 of the Public Utilities Commission Code limits the liability of the utility resulting from a claim regarding adequacy of pressure or supply for fire protection service.
12. The customer shall be responsible for the periodic testing of any backflow prevention devices as required by public authority or the utility. Any repair or replacement of such devices or of any other facilities installed to provide private fire service shall be done at the customer's expense. Any refusal to comply with the above requirements may be grounds for the utility's discontinuing private fire service without liability to the utility.

SERVICE TO PRIVATELY OWNED FIRE PROTECTION SYSTEMS

APPLICABILITY

Applicable to all water service furnished for privately owned fire protection systems.

TERRITORY

All communities served by Kern River Valley District.

RATES

For each inch diameter of service connection ..... Per Month  
\$7.97 (1)

SPECIAL CONDITIONS

1. All bills are subject to the reimbursement fee set forth on Schedules No. UF.
2. The customer will pay, without refund, the entire cost of the private fire service facilities.
3. The private fire service facilities shall be installed by the utility or under the utility's direction and shall be the sole property of the applicant but subject to the control of the utility, with the right to alter, repair, replace and the right to remove upon discontinuance of service.
4. The minimum diameter for the private fire service connection will be four inches. The maximum diameter shall not be larger than the diameter of the water main to which the private fire service facilities are connected.
5. If a water main of adequate size is not available adjacent to the premises to be served, then a new main from the nearest existing main of adequate size will be installed by the utility at the cost of the customer. Such cost shall not be subject to refund.
6. The private fire service facilities will include a detector check valve or other similar device acceptable to the utility which will indicate the use of water. The facilities may be located within the customer's premises or within public rights of way adjacent thereto. Where located within the premises, the utility and its duly authorized agents shall have the right of ingress to and egress from the premises for all purposes related to said facilities. In the event the installation is solely for a private fire hydrant facility, the requirement for a detector check valve or other similar device may be waived.
7. No structure shall be built over the private fire service facilities and the customer shall maintain and safeguard the area occupied by the private fire service facilities from traffic and other hazardous conditions. The customer will be responsible for any damage to the private fire service facilities whether resulting from the use or operation of appliances and facilities on customer's premises or otherwise.
8. Subject to the approval of the utility, any change in the location or construction of the private fire service facilities as may be requested by public authority or the customer will be made by the utility following payment to the utility of the entire cost of such change.
9. The customer's installation must be such as to separate effectively the private fire service facilities from that of the customer's regular domestic water service. Any unauthorized use of water from the private fire service facilities will be charged for at the applicable tariff rates and may be grounds for the utility's discontinuing private fire service without liability to the utility.
10. There shall be no cross connection between the systems supplied by water through the utility's private fire service facilities and any other source of supply without the specific approval of the utility. The specific approval, if given, will at least require at the customer's expense a special double check valve installation or other backflow prevention device acceptable to the utility. Any cross connection may be grounds for immediately discontinuing private fire service without liability to the utility.
11. The utility will supply only such water at such pressure as may be available from time to time as a result of its normal operation of the system. The customer shall indemnify the utility and save it harmless against any and all claims arising against the utility for any loss or damage resulting from service under this schedule. Section 774 of the Public Utilities Commission Code limits the liability of the utility resulting from a claim regarding adequacy of pressure or supply for fire protection service.
12. The customer shall be responsible for the periodic testing of any backflow prevention devices as required by public authority or the utility. Any repair or replacement of such devices or of any other facilities installed to provide private fire service shall be done at the customer's expense. Any refusal to comply with the above requirements may be grounds for the utility's discontinuing private fire service without liability to the utility.

The service charge is a readiness-to-serve charge which is applicable to all metered service and to which is added the charge for water used computed at the quantity rate.

SPECIAL CONDITIONS

1. The annual service charge applies to service during the twelve-month period commencing July 1, and is due in advance. If a permanent resident of the area has been a customer of the utility for at least twelve months, he may elect at the beginning of each year to pay prorated service charges in advance at intervals of less than one year in accordance with the utility's established billing cycle.
2. The opening bill for metered service, except from conversion from flat rate service, shall be the established annual service charge for the service. Where initial service is established after the first day of any year, the portion of such annual charge applicable to the current year shall be determined by multiplying the annual charge by one three-hundred-sixty-fifth (1/365) of the number of days remaining in the year. The balance of the payment of the initial annual charge shall be credited against the charges for the succeeding annual period. If service is not continued for at least one year after the period of initial service, no refund of the initial annual charges shall be due the customer.

The service charge is a readiness-to-serve charge which is applicable to all metered service and to which is added the charge for water used computed at the quantity rate.

SPECIAL CONDITIONS

1. The annual service charge applies to service during the twelve-month period commencing July 1, and is due in advance. If a permanent resident of the area has been a customer of the utility for at least twelve months, he may elect at the beginning of each year to pay prorated service charges in advance at intervals of less than one year in accordance with the utility's established billing cycle.
2. The opening bill for metered service, except from conversion from flat rate service, shall be the established annual service charge for the service. Where initial service is established after the first day of any year, the portion of such annual charge applicable to the current year shall be determined by multiplying the annual charge by one three-hundred-sixty-fifth (1/365) of the number of days remaining in the year. The balance of the payment of the initial annual charge shall be credited against the charges for the succeeding annual period. If service is not continued for at least one year after the period of initial service, no refund of the initial annual charges shall be due the customer.
3. The established billing cycle is every other month (bi-monthly). The billing cycle may be at longer intervals during the winter season.
