

Quality. Service. Value.®

# Infrastructure Improvement Planning for Coast Springs (Bay Area Region)

California Water Service (Cal Water) has prepared a multi-year Infrastructure Improvement Plan to ensure we are able to continue providing a reliable supply of safe, clean drinking water both now and for decades to come.

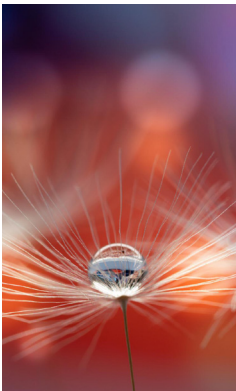

## New Water Supplies

To ensure a consistent supply of safe, high-quality water

## Pumps, Retrofitting Tanks, and Pressure Tank Replacements

To increase system reliability

## Improve Treatment of Existing Supplies

To provide high-quality, safe water

# Where each dollar goes

For these important upgrades and costs to maintain and operate the system, under this proposal, the typical customer using **1,496 gallons** of water per month would have an increase of **6 cents per day** beginning in 2023, followed by an increase of 4 cents per day in 2024 and 4 cents per day in 2025.

**35%**  
Capital Improvements

**8%**  
Local Water Professionals  
(Pump Operators, Utility Workers, etc.)

**41%**  
Water Production

**5%**  
Other Operations & Maintenance

**10%**  
Centralized Services  
(Water Quality, Engineering, etc.)

**1%**  
Conservation
