

October 27, 2017

Advice Letter No. 2268-A

To The Public Utilities Commission of the State of California:

California Water Service Company (“Cal Water”) hereby transmits for filing the following changes in its tariff schedules listed below:

New/Revised CPUC Sheet No.	Title of Sheet	Schedule No.	Cancelling CPUC Sheet No.
XXXXX-W	Preliminary Statement AU		XXXXX-W
XXXXX-W	Table of Contents	Page 2	XXXXX-W
XXXXX-W	Table of Contents	Page 1	XXXXX-W

Purpose

Cal Water filed Advice Letter 2268 on July 21, 2017 requesting authorization from the California Public Utilities Commission (“CPUC”) to establish a Sites Reservoir Memorandum Account (“Sites MA”).

With this supplement, Cal Water proposes that the Sites MA track incremental costs paid by Cal Water to the Sites Reservoir Authority, up to a cap of \$1.05 million, for participation in Phase 1 of the Sites Reservoir Project (“Project”). This supplement is being submitted via a Tier 2 advice letter with a requested effective date of July 21, 2017.

Background

The Sites Reservoir Project (“Sites Project”) is formally known as the “North-of-Delta Offstream Storage Project” (“NODOS”).¹ The proposal for a “Sites Reservoir” has a long history and originated in the 1980s in a proposed Stage II of the State Water Project. In brief, an “offstream reservoir” would be created from winter flood flows of the Sacramento River approximately 78 miles northwest of Sacramento.

A map showing a diagram of the proposed facilities is provided as **Attachment A**.² A map showing the location of the proposed Sites Reservoir in relation to Cal Water’s northern districts is provided as **Attachment B**. Operated in coordination with the State Water Project, the Sites

¹ The name refers to the small community of Sites located in a Northern California valley in Colusa County.

² Sites Reservoir Map, [https://www.sitesproject.org/docs/SITES_ReservoirMap\(Redrawn\)_ForSpread_V3.pdf](https://www.sitesproject.org/docs/SITES_ReservoirMap(Redrawn)_ForSpread_V3.pdf) (accessed 7/20/17).

Reservoir would store water as well as operate as a hydroelectric plant. **Attachment C** to this advice letter is a document providing answers to “Frequently Asked Questions” about the Sites Project.³

Discussion

Overview: The Sites Project Authority (“Authority”) is a joint powers agency made up of local governmental entities within the Sacramento River watershed. In Phase 1 of the Sites Reservoir Project, participants are pursuing Proposition 1 funding through the “Water Storage Investment Program” described below:

In November 2014, California voters approved Proposition 1, the Water Quality, Supply, and Infrastructure Improvement Act of 2014. Chapter 8 of Proposition 1 provides \$2.7 billion for public benefits associated with water storage projects that improve the operation of the state water system, are cost effective, and provide a net improvement in ecosystem and water quality conditions, in accordance with provisions contained in Chapter 8 (Water Code section 79750 (b)). The California Water Commission (Commission), through the Water Storage Investment Program (WSIP) competitive public process, will award and distribute this funding.⁴

The California Water Commission (“CWC”) indicates that “[j]ust over \$2.5 billion is available for project funding of eligible capital costs.”⁵ The timeline is as follows:

- August 2017: applications submitted to the CWC will be reviewed by several state agencies;
- December 2017: CWC releases preliminary cost/benefit scores, and begin preliminary negotiations with project proponents;
- June 2018: CWC selects final projects.

Phase 1 of the Sites Project: Under a “Phase 1 Reservoir Project Agreement” (“*Agreement*”) interested parties are “participating in the development, financing, and construction” of a Sites Reservoir Project that is in a conceptual phase.⁶ In return, they will receive a “first right...to contract for a share of any water supply that is developed, and for storage capacity that may be available from the Sites Reservoir Project.”⁷ Unlike other potential proposals

⁴ *Layperson’s Guide to the Water Storage Investment Program Regulations*, <https://cwc.ca.gov/Documents/2017/WSIP/LaypersonGuide.pdf> (accessed 7/16/17).

⁵ *Water Storage Investment Program, Application Instructions*, https://cwc.ca.gov/Documents/2017/WSIP/WSIP_Application_Instructions_Final.pdf, page 4 (accessed 7/16/17).

⁶ *Sites Project Authority’s Amended and Restated Phase 1 Reservoir Project Agreement (11/21/16 Draft) (“Draft Agreement”)* at 7 (Section 5(a)).

⁷ *Id.* at 7 (Section 5(b)).

that include dams, the Sites Project is an off-stream facility that would divert surplus flows from the Sacramento River and its tributaries, but would not stop the river. The project would require the Department of Water Resources to transfer water rights of over 3 million acre-feet to the Authority. With a budget of over \$15 million, Phase 1 of the Sites Project includes preparing studies for reservoir operations, studies for the design and construction of the reservoir, and an analysis for potentially including pumped storage to provide renewable energy.⁸ The total project cost has been estimated to be \$4.4 billion (in 2015 dollars).⁹

Cal Water Involvement: In response to an invitation from the Sites Authority for additional entities interested in participating in Phase 1 of the Project, Cal Water submitted a Proposal to Participate, contingent upon approval by the Commission, on August 1, 2016 ("*8/1/16 Cal Water Proposal*").¹⁰ As described in the letter, "Cal Water's principal objective(s) that support project participation relate to the company's long-term resource planning goals of developing an increasingly diverse and reliable water supply throughout the State of California. This company-wide effort is principally aimed at addressing a host of current and future concerns pertaining to population growth, sustainable groundwater and surface water management, and climate stress."¹¹

In addition to pursuing recycled water and desalination opportunities in both the private and public/private sectors, a key component of Cal Water's long-term planning is the augmentation and development of new surface water and groundwater storage opportunities. Cal Water's involvement in the Sites Project aligns with the responsibility it has to its customers to engage in regional solutions. Moreover, with its location north of the Delta, Sites Project supplies could potentially be delivered to multiple Cal Water districts throughout the State, through either direct delivery or exchange, via the State Water Project, Central Valley Project and other regional transmission facilities.

Counter-Offer and Acceptance: While Cal Water initially requested 35,000 acre feet of Class 1 (priority status) water (later determined to calculate out to a not-to-exceed cost of \$60 per acre foot), the Sites Authority provided a counter-offer ("*10/11/16 Sites Counter-Offer*") proposing an allocation of 35,000 acre feet of Class 2 (non-priority status) water (which ultimately calculated out to a not-to-exceed cost of \$30 per acre foot).¹²

⁸ *Draft Agreement* at Section 5.1 and Section 7.2 (Table 1).

⁹ *Sites Project: Frequently Asked Questions* at 3. This supplement adds the clarification that the \$4.4 million figure is in 2015 dollars.

¹⁰ Letter from Robert Kuta, Vice President-Engineering, Cal Water, to Ms. Anne Nordyke, Board Clerk for the Sites Reservoir Project, dated 8/1/16 ("*8/1/16 Cal Water Proposal*").

¹¹ *8/1/16 Cal Water Proposal* at 2 (emphasis added).

¹² Letter from James C. Watson, General Manager, Sites Project Authority, to Robert Kuta, Vice President-Engineering, Cal Water, dated 10/11/16 ("*10/11/16 Sites Counter-Offer*") at 2.

While Cal Water accepted this counter-offer, it is not joining the Reservoir Project Agreement (“Agreement”) as a member of the Joint Authority.¹³ Instead, to address the possibility that Cal Water’s participation as a privately-owned public utility could jeopardize eligibility for Proposition 1 funding, Cal Water is considered a “non-member participating party” of the Agreement.¹⁴ In addition, Cal Water and the Authority entered into a side agreement that would allow Cal Water to “amicably separate” from the Reservoir Project Agreement, with a refund of its Phase I contribution at its discretion (“Side Agreement”).¹⁵

Modifications Made in This Supplement to AL 2268

This supplement to AL 2268 includes substantial modifications to the proposed Preliminary Statement AU as follows:

- In Section 1, the Purpose of the preliminary statement is modified to limit the memo account to tracking only Phase 1 costs, up to a maximum of \$1.05 million. The section is also expanded to provide a more detailed description of the five-phase project.
- The Applicability language in Section 2 now recognizes that not all regulated ratemaking areas in California may benefit from the Sites Project. The intent of the Sites MA is to recover the majority of incremental costs tracked in the account from ratemaking areas that have the potential to benefit from the Sites Reservoir Project, by amounts proportional to the potential benefits. Because the potential benefits are unknown at this time, Section 2 requires Cal Water to propose a fair approach for cost recovery if and when the company requests cost recovery.
- The Rates provision in Section 3 is clarified to indicate that the memo account “currently” has no rate component.
- Because it is not clear whether costs tracked in the memo account would be more appropriately considered capital or expense, the Accounting Procedure in Section 4 now includes provisions for both options. It also clarifies that the tracked costs may only be related to invoices paid to the Sites Reservoir Authority. Finally, the methodology that should be used for the interest calculation is specified.
- In Section 5, the Regulatory Procedure is modified to require that a request for cost recovery be submitted in a formal Commission proceeding, as opposed to the informal “advice letter” process.

¹³ Letter from James C. Watson, PE, General Manager, Sites Project Authority, to Robert J. Kuta, Vice-President, Engineering, California Water Service Company, dated April 28, 2017, counter-signed by Robert J. Kuta (“4/28/17 Side Agreement”).

¹⁴ *Id.* at 1.

¹⁵ *Id.* at 2.

The Modified Sites MA Meets the Criteria for a New Memo Account

As modified, the proposed Sites MA meets all of the Commission's criteria for the creation of a new memorandum account.¹⁶

- (1) The expense is caused by an event of an exceptional nature that is not under the utility's control.

The Sites Reservoir Project offers an unusual opportunity for Cal Water. The numerous participants in Phase 1 and their significant financial contributions reflect a strong belief in the viability of the project,¹⁷ a viability that is enhanced by possible state involvement through Proposition 1 funding. In addition, Cal Water is uniquely placed in that it has multiple operating districts that could benefit. Water reliability in several Cal Water districts could be enhanced through existing wholesaler relationships, while in other districts, additional water supply could be made available through the negotiation of new contracts. For these reasons, Cal Water views the Sites Reservoir Project as an "event" of an exceptional nature.

The Sites Reservoir Authority, which was created to pursue the possibility of a Sites Reservoir Project, and its members have developed a 5-phase plan for the proposed project with certain deadlines and milestones. Because Cal Water's participation in the Project is subject to the schedule established by the Sites Authority, the timing of the "event" is not within Cal Water's control.

Cal Water nevertheless had the choice of whether or not to become involved in the Sites Project. Accordingly, Cal Water did not agree to participate in Phase 1 until relatively late in the process. The Sites Authority was concerned that having an investor-owned participant could jeopardize Proposition 1 grant funding. Cal Water was concerned about committing funds in the absence of clear Commission support. The parties were therefore able to negotiate the Side Agreement allowing each party to withdraw under certain circumstances.¹⁸ If Cal Water decides that Commission authorization to recover Phase 1 costs is in doubt before Phase 1 ends, the side agreement allows Cal Water to retrieve funds it has paid from the Sites Authority directly, or to retrieve its funds from an interested party through the transfer of Cal Water's rights to the interested party.¹⁹

¹⁶ The Commission's criteria are listed as they appear in Resolution W-4824, *California-American Water Order Authorizing Memorandum Account to Track Costs Incurred to Address the State Water Resources Control Board Cease and Desist Order for Unauthorized Diversion of Water from the Carmel River in the Monterey District* (April 8, 2010), at 5.

¹⁷ There are approximately 19 participants in the Sites Project that include water, reclamation, and irrigation districts, mutual water companies, and cities and counties.

¹⁸ *4/28/17 Side Agreement*.

¹⁹ *Id.* at 2.

Now that Cal Water has entered into both the Phase 1 Agreement and the Side Agreement, the timing and amount of invoices received from the Sites Authority, up to the contractual maximum of \$1.05 million, is beyond Cal Water's control.

- (2) Expense cannot have been reasonably foreseen in the utility's last GRC and will occur before the utility's next scheduled rate case.

As discussed above, the timing for the different milestones and phases of the Sites Reservoir Project is not within Cal Water's control. Californians did not approve Proposition 1 funding until late 2014, after which Phase 1 of the Sites Project was developed. Given that the Sites Authority decided to solicit additional participants in mid-2016, Cal Water could not have foreseen its involvement prior to the company's July 2015 rate case filing.

Further, Cal Water is already incurring costs, and has the potential to incur additional costs through the end of Phase 1 in June 20, 2018, which is before Cal Water's next GRC filing in July 2018.

- (3) Expense is of a substantial nature in the amount of money involved.

While Cal Water's first invoice is for \$574,700, the Agreement allows Class 2 water to be charged up to \$30 per acre-foot.²⁰ For the 35,000 acre-foot of Class 2 water potentially allocated to Cal Water, Cal Water could be requested to pay up to \$1.05 million just for Phase 1 of the Sites Project. There does not appear to be any dispute that this amount is of a substantial nature, and that this criterion for a new memo account is met.

Clarification: In its Protest, ORA provides calculations to estimate the investment per AF for which Cal Water could theoretically be responsible, using a total project cost of \$5.176 million.²¹ While Cal Water neither endorses nor rejects ORA's methodology, Cal Water notes that the total investment cost "allocated" to Cal Water must be annualized in order to calculate an "investment per acre foot" using the given methodology. Specifically, to calculate an investment per acre-foot using the information available in ORA's Table, such as a take-rate of 35,000 AF per year, an assumption about the life of the asset would be needed. Assuming a conservative asset life for the dam and related facilities of 40 years, for example, the investment costs would calculate out to \$320 per AF, rather than the \$12,812 per AF calculated in ORA's Protest.²²

- (4) Ratepayers will benefit by the memorandum account treatment.

The Sites Project has the potential to create significant ratepayer benefits; if successful, it could mitigate water supply reliability concerns and fulfil regulatory requirements in multiple Cal Water district throughout the State. It is also well-suited to memo account treatment because the

²⁰ This amount is for 35,000 acre-feet of Class 2 water at \$16.42 per acre-feet.

²¹ ORA Protest at 4.

²² The updated equation would be \$448,415,842 divided by 40 years, divided by 35,000 AF per year = \$320.30 AF per year.

districts that will likely benefit, and the magnitude of those benefits, will not be known until the project progresses further. The proposed memo account will allow Cal Water to proceed with Phase 1 of the project, and will give the Commission the opportunity to consider at a later date whether costs tracked in the account are appropriate for recovery through rates, and if so, from whom.

As discussed above, Cal Water has also negotiated an agreement with the Sites Reservoir Authority that will allow Cal Water to obtain reimbursement of any Phase 1 payments under certain conditions:

The Authority also acknowledges that California Public Utility Commission (CPUC) approval will be necessary in order for Cal Water to recover the costs of [Phase 1 of] the Project through rates charged to water customers. In the event of an unacceptable or adverse treatment of Cal Water's request for rate recovery or a determination by Cal Water that a CPUC decision will not be timely rendered and final prior to the end of Phase 1, Cal Water may (1) withdraw and would be reimbursed by the Authority for its past payments at the time of this determination, or (2) arrange for the transfer of its share in the Project to a party or parties eligible to participate....²³

Finally, ORA has expressed concern that Cal Water's originally requested memo account, and the Sites Project as a whole, cannot be thoroughly evaluated outside of a formal Commission proceeding. Cal Water has therefore agreed to seek any cost recovery of Phase 1 expenditures only through a formal Commission proceeding, and to make any request to track costs beyond Phase 1 in a formal Commission proceeding.

Requested Effective Date

This advice letter is submitted with a Tier 2 designation pursuant to Water Industry Rules 7.3.2(5) and (7) of General Order 96-B. Cal Water is requesting that this filing become effective on July 21, 2017, the date upon which AL 2268 was originally filed, in order to allow Cal Water to begin tracking the first payment to reserve the opportunity to participate in the Sites Reservoir Project.

Notice

Customer Notice: This is a Tier 2 advice letter that does not require customer notice because there is no increase in rates.

Service List: In accordance with General Order 96-B, General Rules 4.3 and 7.2, and Water Industry Rule 4.1, a copy of this advice letter will be mailed or electronically transmitted on

²³ 4/28/17 *Side Agreement* at 2. Note that, while documents exchanged between the Authority and Cal Water may contain references to "Commission approval" of Cal Water's involvement in the Sites Reservoir Project, Cal Water is not seeking that "approval" here. Instead, Cal Water's request is limited to authority to open a new Sites Reservoir memorandum account.

October 27, 2017 to competing and adjacent utilities and other utilities or interested parties having requested such notification.

Response or Protest

Anyone may respond to or protest this advice letter. A response supports the filing and may contain information that proves useful to the Commission in evaluating the advice letter. A protest objects to the advice letter in whole or in part and must set forth the specific grounds on which it is based. These grounds are:

- (1) The utility did not properly serve or give notice of the advice letter;
- (2) The relief requested in the advice letter would violate statute or Commission order, or is not authorized by statute or Commission order on which the utility relies;
- (3) The analysis, calculations, or data in the advice letter contain material error or omissions;
- (4) The relief requested in the advice letter is pending before the Commission in a formal proceeding; or
- (5) The relief requested in the advice letter requires consideration in a formal hearing, or is otherwise inappropriate for the advice letter process; or
- (6) The relief requested in the advice letter is unjust, unreasonable, or discriminatory (provided that such a protest may not be made where it would require relitigating a prior order of the Commission.)

A protest shall provide citations or proofs where available to allow staff to properly consider the protest. A response or protest must be made in writing or by electronic mail and must be received by the Water Division within 20 days of the date this advice letter is filed. The address for mailing or delivering a protest is:

Tariff Unit, Water Division, 3rd floor
California Public Utilities Commission,
505 Van Ness Avenue, San Francisco, CA 94102
water_division@cpuc.ca.gov

On the same date the response or protest is submitted to the Water Division, the respondent or protestant shall send a copy by mail (or e-mail) to us, addressed to:

Natalie Wales
California Water Service Company
1720 North First Street,
San Jose, California 95112
Fax (408) 367-8566 or
E-mail nwales@calwater.com

Cities and counties that need Board of Supervisors or Board of Commissioners approval to protest should inform the Water Division, within the 20 day protest period, so that a late filed

protest can be entertained. The informing document should include an estimate of the date the proposed protest might be voted on.

The advice letter process does not provide for any responses, protests or comments, except for the utility's reply, after the 20 day comment period.

Replies

The utility shall reply to each protest and may reply to any response. Each reply must be received by the Water Division within 5 business days after the end of the protest period, and shall be served on the same day to the person who filed the protest or response. If you have not received a reply to your protest within 10 business days, contact California Water Service Company at 408-367-8200.

Preliminary Statement
(continued)

AU. SITES RESERVOIR MEMORANDUM ACCOUNT (SITES MA)

(N)

1. PURPOSE: The purpose of the Sites Reservoir Memorandum Account (Sites MA) is to track the costs for payments made to the Sites Project Authority for Phase 1 of the proposed "Sites Reservoir," an off-stream project located on the west side of the Sacramento Valley (approximately 10 miles west of Maxwell), currently projected to yield up to 500K acre-feet of water per year. The Sites MA is capped at the estimated \$1.05 million maximum payment for Phase 1.

In Phase 1 of the project, state grant funding under Proposition 1 (approved in 2014) is being pursued and draft environmental impact studies are being prepared. There are five phases of the project, with the construction of facilities beginning in 2022 under Phase 4. The project is anticipated to be operational in 2029.

2. APPLICABILITY: The Sites MA may be applicable to all regulated operations in California. A request for recovery of amounts in this account will identify the proposed ratemaking areas from which recovery is being sought, and will be accompanied by a justification for the proposal.

3. RATES: The Sites MA currently has no rate component.

4. ACCOUNTING PROCEDURE: The entries made to the Sites MA may include the following. These entries are not cumulative and are tracked in order to preserve the range of potential regulatory outcomes the Commission may elect if recovery is granted.

Expenditure Entries

a. Amounts equal to invoices paid to the Sites Reservoir Authority for Phase 1 of the project, up to a cap of \$1.05 million.

Revenue Requirement Entries

b. Amounts equal to the revenue requirement of each expenditure recorded in (a.) as if it were shareholder-funded (including return on investment, income taxes, ad valorem tax, depreciation, other taxes and fees).

Interest

c. Interest calculated based on the average balance in each segment of the account multiplied by 1/12th of the most recent month's interest rate on Commercial Paper (prime, 90-day), published in Federal Reserve Statistical Release H-15.

5. REGULATORY PROCEDURE:

Requests for recovery of any balance in the Sites MA shall be made in a general rate case or a separate application. Requests for recovery shall include a showing that the costs requested for recovery are not included in rates.
