RESIDENTIAL METERED SERVICE

SPECIAL CONDITIONS

1. Qualifying low-income individually metered residential customers are eligible for credits as shown on **Schedule CAP**.
2. All bills are subject to the following tariff schedules: **Schedule UF** (CPUC reimbursement fee) and applicable surcharges and surcredits on **Schedule RSF** (Rate Support Fund), **Schedule CAP** (Customer Assistance Program), and **Schedule AS** (Additional Surcharges and Surcredits).
3. **Fire sprinkler rate:** A single-family residence with a meter size that has a “fire sprinkler” rate (listed above) is eligible for that rate if: (a) the customer is paying for service where a residential fire sprinkler system is required/requested to be installed by local fire or building codes; (b) a smaller meter would be large enough to provide adequate service in the absence of the additional demand needed to supply water to the system; (c) the sprinkler system is served through the meter providing residential water service; and (d) the customer requests the “fire sprinkler” rate. The Company may seek verification that the above criteria are met. This service will be considered a general metered service, and not a fire service, so the rules and conditions for general metered service shall apply.
4. **Water Expense Increase:** Beginning on January 1, 2026, rates in this area will reflect a 3.06% revenue increase due to higher wholesale water charges by the West Basin Municipal Water District and lower charges for purchased power from Southern California Edison This caused quantity rates to go up by the following amounts: \$0.0789/CCF for Tier 1 usage, \$0.3156/CCF for Tier 2 usage, \$0.3945/CCF for Tier 3 usage, and \$0.5917/CCF for Tier 4 usage. Amounts collected from these quantity rate increases will be tracked in a balancing account, as required by Section 792.5 of the Public Utilities Code. The monthly service charge for a 5/8 x 3/4-inch meter decreased by \$0.27. (T)
