**October 26, 2018****Advice Letter No. 2316**

To the California Public Utilities Commission:

California Water Service Company ("Cal Water") respectfully submits this Tier 2 advice letter to update the service area map for the Livermore district.

**Summary**

Cal Water requests modifications to its Visalia service area boundary and its service area map.

**Background**

Cal Water most recently filed an update to its Visalia service area map on October 18, 2016 in advice letter 2223. Now, Cal Water will be extending service to the contiguous areas mark on the proposed map. These parcels contain residential customers that will be served by Cal Water.

**Discussion**

The service area map submitted in this advice letter contains two extension of the current service area boundary.

The first extension will be adjacent to the current service area boundary and include 68 domestic services, three irrigation services and 9 fire hydrants. A majority of the development is slated to be single family and multi-residential units. This area is labeled as (1) on the proposed service area map.

The second extension will be adjacent to Visalia's Mullen system. The current owner uses this parcel for agricultural reasons but will soon construct a single family residence that will require water service from Cal Water. This area is labeled as (2) on the proposed service area map.

In lieu of the Water Supply and Certification Questionnaires (WSQs), Cal Water is providing excerpts from Visalia 2015 Urban Water Management Plan. In doing so, Cal Water is able to provide proof that it, "Already has a water supply adequate to serve areas or a plan to obtain such supply," as required by GO 96-B, Rule 8.1.

The UWMP was adopted in June 2016 and submitted to the California Department of Water Resources in July 2016.

Chapter 3 of the UWMP provides a description of the system, including a discussion on the population. Chapter 4 focuses on system water use with a breakdown of actual water demand by use type in Table 4-1 as well as projections through 2040 for water demand in Table 4-2 (by use type) and Table 4-3 (total). Meanwhile, Table 4-4 provides a water loss summary from the most recent 12-month period available.

Chapter 6 discusses system supplies and provides a summary of water supplies in Table 6-8 (actual) as well as projected water supplies in Table 6-9.

Taken in combination, Table 4-1 and Table 6-8 demonstrate that developments added to the district's service area have had sufficient water supplied.

Taken in combination, Table 4-2 (or Table 4-3) and Table 6-9 demonstrate that projected growth will have sufficient water supplied.

Cal Water will provide a copy of the UWMP to the Water Division upon request.

**Authority**

Cal Water submits this as a Tier 2 advice letter according to General Order 96-B, Water Industry Rule 7.3.2(8).

**Requested Effective Date**

Cal Water requests that the attached tariffs in this Tier 2 advice letter become effective on November 26, 2018.

**Notice**

In accordance with General Order 96-B, General Rule 4.3 and 7.2 and Water Industry Rules 4.1 and 4.2, a copy of this advice letter has been mailed or electronically transmitted on October 26, 2018 to the service list for this district, including parties who have requested copies when revisions are made to this district's service area map.
