**Advice Letter No. 2495**

**CALIFORNIA WATER SERVICE COMPANY (U-60-W)**

To The Public Utilities Commission of the State of California:

California Water Service Company (“Cal Water”) hereby respectfully requests authority to update the following tariff schedules table of content applicable to all regulated ratemaking areas, and to inform the Commission that the Water Cost of Capital Mechanism (“WCCM”) has triggered for all regulated Class A ratemaking areas (excludes the Grand Oaks District), resulting in an increase in rates starting January 1, 2024. ***Please note that this advice letter will only be distributed electronically.***

		<u>Sheet No.</u>

***See Attachment 1***

**Summary**

This advice letter notifies the Commission that the Water Cost of Capital Mechanism (“WCCM”) has triggered an increase in Cal Water’s rate of return (“ROR”) from 7.08% to 7.46% (70 basis points) for rates beginning January 1, 2024 for all Class A ratemaking areas. As compared to current revenues, this results in a revenue increase of approximately \$9.8 million dollars.<sup>1</sup>

**Background**

In D.23-06-025, the Commission established a 9.05% return on equity (“RoE”) and 4.23% cost of debt for Cal Water, with a capital structure of 46.60% long-term debt and 53.40% common equity (no change from previously adopted), resulting in an authorized ROR of 6.80%. Prior to the decision, Cal Water had an authorized ROR of 7.48%.

Ordering Paragraph 7 of D.23-06-025 also retained the WCCM, which automatically adjusts the cost of capital when fluctuations in capital markets occur between cost of capital applications:

- 7. California-American Water Company, California Water Service Company, Golden State Water Company, and San Jose Water Company shall continue with their Water Cost of Capital Mechanism for the years 2023, and 2024, using the base year 2022 adopted in this decision.

---

<sup>1</sup> Note that current revenues and rates have been interim since January 1, 2023 pending resolution of Cal Water’s 2021 General Rate Case (A.21-07-002).

In Advice Letter 2485, Cal Water updated Preliminary Statement S to reflect changes to the WCCM ordered by D.23-06-025. Cal Water also provided notice that the WCCM had triggered a return on equity increase of 52 basis points, resulting in a rate of return increase to 7.08%. Cal Water implemented the new rates based on the 7.08% ROR on July 31, 2023.<sup>2</sup>

## **Discussion**

**New Benchmark for 2024 Rates:** Section 3(c) of Preliminary Statement S, which states that:

In any year where the 12-month October 1 through September 30 average of the Moody's Utility Bond Index rates triggers an automatic return on equity adjustment, that average becomes the new benchmark.

As indicated in AL 2485, the WCCM triggered for 2023 rates because the average interest rate shown on Moody's AA Utility Bond Index was 3.92%, an increase of over 100 basis points from the initial benchmark of 2.89%. The new benchmark for 2024 rates is therefore 3.92% consistent with Section 3(c).

**WCCM Trigger for 2024 Rates:** Section 3(b) of Preliminary Statement S states that:

If the "deadband" (the range of change in interest rates that may occur without automatically triggering a change in the return on equity) of 100 basis points is exceeded, Cal Water's return on equity will be adjusted by one-half of the difference between the benchmark and the October 1 to September 30 average.

As shown in workpapers, the average interest rate shown on Moody's AA Utility Bond Index (with a credit rating of AA or A) for the period of October 3, 2023 through September 29, 2023 is 5.31%, an increase of over 100 basis points from the new benchmark of 3.92%. Consistent with Section 3(b), Cal Water's return on equity should be increased by **70 basis points**, one-half of the difference between the target benchmark and the new benchmark.

**Filing Requirement for Triggered WCCM:** Section 3(f) of Preliminary Statement S states:

For rates implemented in 2024, if the 100 basis point deadband is exceeded, Cal Water will submit a Tier 2 advice letter by October 15, 2023 to update return on equity and related rate adjustments to become effective on January 1, 2024. The advice letter would also update long-term debt and preferred stock costs to reflect actual August month-end embedded costs in that year and forecasted interest rates for variable long-term debt and new long-term debt and preferred stock scheduled to be issued.

Cal Water's analysis indicates that no adjustment of the cost of debt is warranted at this time. With the adjustment to the adopted RoE and no change to the cost of debt, Cal Water's ROR will be 7.46%, as shown in Figure 1 below. This 38-basis-point increase in the ROR from 7.08% to

With this advice letter, Cal Water is providing workpaper calculations showing how the increased ROR impacts the revenue requirement of each ratemaking area based on the last adopted revenues. Cal Water is not providing the rate design workpapers that generate rates, however, because rates effective January 1, 2024 may be adjusted for additional reasons. Producing such workpapers for Commission staff review would not be an efficient use of time for either Cal Water or Commission staff. Instead, new rates reflecting all approved revenue adjustments will be submitted in a subsequent advice letter and will be accompanied by all workpapers (for revenue requirements and rate designs and the resulting tariffs).

**Requested Effective Date**

Consistent with Section 3(f) of Preliminary Statement S, this Tier 2 advice letter is being submitted before October 15, 2023. Because this advice letter updates the Table of Contents for Cal Water’s

<sup>3</sup> As previously indicated, current revenues and rates have been interim since January 1, 2023 pending resolution of Cal Water’s 2021 General Rate Case (A.21-07-002).

tariffs, in addition to triggering the WCCM, Cal Water requests that approval of the advice letter as a whole be considered effective **November 13, 2023**.

Given the language in the text of this advice letter and in Preliminary Statement S, it should be clear that Cal Water is proposing that the customer impact of approving Cal Water's assertions regarding the WCCM and the underlying calculations will not become effective until January 1, 2024, regardless of the technical effective date of the advice letter.
