

# Providing Reliable Water Delivery to Support Emergency Needs

Cal Water is committed to ensuring a sufficient, reliable water supply to support emergency needs, including fire protection.

Cal Water supports more than

**50**

fire departments

— and —

**125**

fire stations across the State of California.

## Keeping our system reliable ensures continued service for firefighters:

In the last three years, Cal Water has invested more than **\$227 million in water mains**, allowing us to deliver water efficiently to ensure the supply is reliable.

Cal Water maintains about **50,000 fire hydrants** to ensure firefighters have access to water sources with adequate pressure whenever needed.

In California, it's **essential that firefighters have enough water supply and water pressure to effectively do their job**, and we're here for them 24/7.

Quality. Service. Value.®

Reliability Runs Deep
